Concept Statement

George and Judy are looking to redesign master bedroom bath to create a luxurois aesthetic. They would like to have a space that allows them to age in place but allows for accessible design features. They asked for muted tones but they also wanted to have a few pops of color to add contrast to the space.

I have designed a minimalistic space that allows for pops of color. I have incorporated tones of navy blue with gold accents. I have also incorporated materials that allow you to move around in the space and get in and out safely. There is also a water closet with privacy screening. With new material and finishes, this space will get the remodel it needs.
